Extracted symptoms:

fever,
lack of appetite

Denied symptoms: None

Current possible disease:

diphtheria, mumps,
measles, leptospirosis

Proactive Interaction

Do you have **nasal congestion**,
facial paralysis, **generalized fatigue**?

Multimedia Treatment Plan

Diagnosis Result

Dietary Recommendations

1. During the onset of the illness, it is advisable to consume mashed eggplant and chew it thoroughly to swallow the juice, or drink loofah juice or take dried persimmon frost dissolved in water. These can all serve as supportive treatments.
2. Eat fresh vegetables and fruits that are rich in vitamins.
3. Eat small meals more frequently.

Dietary Restrictions

Avoid spicy and irritating foods, as well as hot-natured, dry, hard-to-digest, and difficult-to-swallow foods.

Lifestyle Management

1. During recovery, ensure adequate rest and maintain good sleep quality.
2. Keep the indoor environment clean and hygienic, with a suitable temperature and proper humidity. Make sure bed sheets and bedding are clean, dry, and soft.
3. Engage in moderate exercise, but avoid overexertion.
4. Keep warm and dress appropriately according to the weather to prevent catching a cold.
5. Be mindful of the spread of pathogens—avoid facing others when sneezing or coughing.
