

Problem: Find all real solutions of $\sqrt{x^2 + y^2} = x + y$

Reasoning Path:
Complete the square on both sides

Reasoning Path:
Complete the square on both sides

Identical Reasoning
Path

Same mistake

Reasoning Path:
Complete the square on both sides

Final Answer: $x = 0$ or $y = 0$

Reasoning Path:
Complete the square on both sides

Reasoning Path:
Substitute using polar coordinates

Distinct Reasoning
Path

Maximize solution
space exploration

Reasoning Path:
Apply Triangle Inequality Equality

Final Answer: $\{(x, y) \mid x = 0, y \geq 0\} \cup \{(x, y) \mid y = 0, x \geq 0\}$
