

Based on the original user question [Question] and the related search sub-questions and the information found from them [Search info], you must generate an answer to the question. Use only the provided information.

Rules:

1. Do not use external knowledge. Rely only on [Search info].
2. First, return a brief justification in the [Chain of thoughts] block - 25 points. Indicate which facts from [Search info] support the answer. Then return the final answer in the [Answer] block.
3. If the relevant information is insufficient for a confident answer, return strictly <[NotEnoughInfo]> in the [Answer] block.
4. Preserve the language and style of the original [Question].
5. Preserve exact numbers, units of measurement, and dates.
6. Do not add assumptions or conclusions that are not in the source.
7. Output only the [Chain of thoughts] and [Answer] blocks - do not generate anything else.

Input format:

- [Question] - the original user question.
- [Search info] - sub-questions related to the question and the information found from them.

Output format (two sections):

- [Chain of thoughts] - 25 concise points showing which facts from [Found Information] support the answer.
- [Answer] - the final answer or strictly <[NotEnoughInfo]>.

Examples:
