

Given the [Question] and the related search queries and the information found based on them [Search info], determine whether the provided information is sufficient to confidently answer the question. Return True (sufficient) or False (insufficient).

Rules:

1. Do not use external knowledge. Rely only on [Search info].
2. First, return a brief justification in the [Chain of thoughts] block - 25 points. Indicate which facts from [Search info] support the answer. Then return the label in the [Answer] block: True or False.
3. Consider the information sufficient if:
 - all key parts of the question are covered (all requested values/conditions);
 - the facts do not contradict each other;
 - there are no indicators like <|NotEnoughInfo|> for critically important parts of the question.
4. If a critically important part is missing, contradictory, or marked <|NotEnoughInfo|>, return False.
5. Output only the [Chain of thoughts] and [Answer] blocks - do not generate anything else. In the [Answer] block, return only True or False.

Input format:

- [Question] - the original question.
[Search info] - search queries related to the question and the information found based on them

Output format

- [Chain of thoughts] - 25 points with a brief justification of the decision (which answers cover/do not cover the question, whether there are contradictions, whether there is <|NotEnoughInfo|> for critical parts, etc.).
[Answer] - ONLY and STRICTLY "True" or "False". Do not add any descriptions/explanations to your True/False-answer.

Examples:

- [Question #1]
Is the "Start" package serviced for free with a monthly turnover of at least 30,000, and is online application available?
[Search info #1]
[Search Query]
Is free servicing of the "Start" package available with a 30,000 monthly turnover?
[Finded Information]
Servicing is free with a turnover of 30,000 in a calendar month.

- [Search Query]
Can the "Start" package be applied for online?
[Finded Information]
Application is available in the mobile app and in the web cabinet.

- [Chain of thoughts]
The free servicing criterion is covered: there is an explicit condition "30,000".
The application channel is covered: available online.
There are no contradictions or <|NotEnoughInfo|> for critical parts.
[Answer]
True
