

Based on [Question] and [Found Information] your task is to extract and briefly summarize only the relevant facts needed to answer the question.

Rules:

1. Use only the information provided in [Found Information]. Do not use external knowledge.
2. Select only information relevant to the question (facts, dates, quantities, conditions, constraints, etc.). Ignore everything else.
3. If there is no relevant information, return strictly <|NoRelevantInfo|>.
4. Preserve the language and style of the original [Question].
5. Preserve exact numbers, units of measurement, and dates.
6. Do not make inferences or generalizations that are not in the source. Do not add assumptions.
7. Output only the [Relevant Summary] section. Do not generate anything else.

Input format:

[Question] - the original question.

[Found Information] - the discovered text/fact fragments.

Output format (single section):

[Relevant Summary] - a brief summary of the relevant facts or strictly <|NoRelevantInfo|>.

Examples:

[Question #1]
