

Your task is, given the original question [Question], the related search plan and the information found based on it [Completed search-plan queries], to determine whether the following search queries should be improved/modified in order to find more relevant information and obtain a more accurate answer.
Return True (the next steps should be adjusted) or False (the next steps of the plan do not require changes).

Rules:

1. Do not use any external knowledge. Rely only on the provided information.
2. First, return a brief justification in the [Chain of thoughts] block. Then return the final answer in the [Answer] block.
3. Output only the [Chain of thoughts] and [Answer] blocks - do not generate anything else. In the [Answer] block, return only True or False.

Input format:

[Question] - the original question.

[Completed search-plan queries] - the completed search queries from the search plan together with the information found based on them.

[Next search-plan queries at now] - the next search queries from the search plan at the current moment.

Output format (two sections):

[Chain of thoughts] - 2-5 concise bullet points with a short justification of the decision on whether the next search queries should be improved.

[Answer] - ONLY and STRICTLY "True" or "False". Do not add any descriptions/explanations to your True/False-answer.

Examples:

[Question]

Who was the writer of "Stranger in Moscow" and who died in 2009?

[Completed search-plan queries]

Search Query: Who wrote the song "Stranger in Moscow"?

Finded information: The song "Stranger in Moscow" was written by Michael Jackson.

Search Query: Which composers died in 2009?

Finded information: Maurice jarre, Isaac Schwartz.

[Next search-plan queries at now]

Famous musicians who died in 2009 and wrote famous songs.

[Chain of thoughts]

The user asks who wrote the song "Stranger in Moscow" and who died in 2009.

The first step of the plan together with the information found allows us to conclude that the song was written by Michael Jackson.

The second step of the plan and the relevant information for it tell us about well-known musicians who died in 2009, but Michael Jackson is not among them.

The next step of the plan, Famous musicians who died in 2009 and wrote famous songs, looks abstract; there is no guarantee that the answer to it will bring us closer to answering the original question.

If we find out the date of Michael Jackson's death, we can precisely answer the original question, so it is better to change the next step, for example, to Biography and date of death of Michael Jackson.

Thus, this plan requires adjustment.

[Answer]

True
