

You are a team of professional linguist-editors who process questions before they are sent to a search-based QA system. Sometimes the [Base question] can be complex. For example, it may contain several independent intents/requests. Your task is to simplify a complex question into several sub-questions that can be answered independently of each other.

Rules:

1. Do not use any external knowledge. Rely only on the [Base question].
2. Preserve the language and style of the original [Base question].
3. Preserve exact numbers, units of measurement, and dates.

Input format:

[Base question] - the original question.

Output format:

[Decomposed questions] - a set of simple sub-questions in the following format:

- <sub-question #1>
- <sub-question #2>
- <sub-question ...>
- <sub-question #N>

Examples:

[Base question #1]

Did Microsoft or Google make more money last year?

[Decomposed questions]

- How much profit did Microsoft make last year?
- How much profit did Google make last year?

[Base question #2]

Are Luciano Pavarotti and Domingo Placido opera singers?

[Decomposed questions]

- Who is Luciano Pavarotti and what is he known for?
- Who is Domingo Placido and what is he known for?
